

# Interprofessional Dementia Workshops

The Health Education and Training Institute together with the NSW/ACT Dementia Training and Study Centre presents:

## Dementia: the Essentials

Lecture series every Tuesday evening in February 2013

Presented by Professor Sue Kurrle and Professor Henry Brodaty

Understanding dementia is relevant to all health professionals. This is a clinical teaching series primarily open to trainees undertaking training in emergency medicine, psychiatry, general practice, rehabilitation, physician training (in particular basic physician training and geriatric medicine). These workshops are also available to other health practitioners. Each session will provide current knowledge and skills for managing dementia from a team perspective. Some of the topics include investigations, diagnosis, psychiatric co-morbidity, prognosis and pharmacotherapy.
