# "PHYSICAL THEATRE AT ITS BEST"

SYDNEY MORNING HERALD

Writer Peggy is in her late 50s and has younger onset dementia. Her relationship with the present and the past is beginning to dissolve. If a loved one starts to lose their memories, what role can we play in holding on to them? And how can we care for them in the present while honouring their memory?

*Sundowner* is the result of years of research and community engagement and was the subject of a highly regarded ABC *Artscape* documentary. It expertly combines theatre, dance and physicality in a story of lament, grief, and ultimately, love.

Featuring original dancers from the Tivoli Theatre and complemented by original music by Kelly Ryall, Megan Washington and Paul Kelly, *Sundowner* is an exquisite and powerful story of family, love and loss told through the eyes of three generations.
