

Improving outcomes for a timely diagnosis and management of dementia in general practice

**This Active Learning Module has been approved by the RACGP QI&CPD Program
Total Points: 40 Category 1 points**

As a GP, we are well aware how time consuming your profession is, with more and more demands being made upon you. We also know how many more cases of dementia – be it late or early onset – are going to be presented on your doorstep. In this ALM you will be provided with the opportunity to gain more insight in to how you can be assisted with best practice identification and management of your patients.

DATE: Saturday 9 March, 2013,
TIME: 8.30am (Registration) -17.00pm
VENUE: Quality Inn, Latrobe Convention Centre, 5601 Princes Highway Traralgon.
SPEAKERS: Dr Allan Shell and Dr Holly Anderson

Learning Objectives:

1. To increase awareness of the current clinical guidelines for the diagnosis and management of dementia in general practice.
2. To improve diagnostic acumen with respect to cognitive impairment.
3. To identify factors in both the practitioner and the patient that may be potential barriers to the diagnosis of dementia.
4. To understand the impact of a patient with dementia on family and carers and the community support and services that are available.
5. Implement a system in the practice using screening tools for all patients over 75 years for both cognitive impairment and depression.
